CKIT4
EXPANSION KIT

Installation Instructions

Pagoda Area Light

LED Bulb

Hub

Wire

Assemble the hubs by connecting your wires and attaching the black ground stakes.

Install the bulbs by unscrewing the pagoda head and pushing the Bi-pin into place.

- 1 Turn off the transformer (the green light will go off) and unplug the existing system from the power outlet.
- 2 Assemble the hub by attaching the black ground stake to the hub.
- 3 Locate the new hub in the center of where the fixtures will be placed and within 25ft of an existing hub.
- 4 Position the fixtures as desired, insert the bulbs, and run the wire from each fixture to the hub.
- 5 Use the wire included in this kit to connect the new hub with one of the existing hubs or connect the wire directly to the transformer.
- 6 If desired the fixture wires and the hub wires can be shortened.
- 7 When satisfied with the location of the fixture and after the connections are made plug the transformer into the outlet and turn the transformer on.
- 8 Test the system by turning the timer to the on position, make sure the fixtures work correctly.
- 9 Visit the installation after dark to make sure the fixtures are located correctly and adjust as needed, when satisfied return the timer to the preferred setting.
