

INSTALLATION INSTRUCTIONS

VOLT® LOW VOLTAGE LANDSCAPE LIGHTING

VOLT® 16ft RGBW LED Rope Light

ITEM: VRL-RGBW-16

1-813-978-3700 • Mon-Fri 8am-8pm • Sat-Sun 10am - 6pm (EST)

**IMPORTANT: PLEASE READ BEFORE INSTALLATION**

This fixture is intended for installation in accordance with local codes and the National Electric Code (NEC). Failure to adhere to these codes and instructions may result in serious injury, property damage and void the warranty.

These instructions do not intend to cover all variations in installation, operation maintenance or mounting situation.

1. Make sure that the power is turned OFF before installing or servicing this fixture.
2. Warning: this fixture is not intended to be installed within 10 feet [3 meters] of a pool, spa or fountain.
3. This fixture is intended to be used only with a power supply (transformer) rated maximum of 300 watts (25 AMPS) at 15 volts.
4. Underground Low Energy Cable must not be buried over 6" (15.2 cm) in order to connect to the main low voltage cable.
5. Wiring connections must be made with UL Listed wire connectors that is suitable for the application.
6. Position the wire connector so that it is located within 6 inches (15.2 cm) from a building structure, a luminaire, or fitting.
7. If additional lengths of low voltage cable is required, please call 1-813-978-3700.

PACKAGE CONTENTS

- | | |
|--------------------------------------|---------------------|
| A. (1) Neon Light Strip (L16.4 feet) | D. (10) Wall Anchor |
| B. (1) End Cap | E. (10) Screw |
| C. (10) Strip Holder | F. (1) IR Remote |

IMPORTANT: PLEASE READ BEFORE INSTALLATION

Refer to the following illustrations for the correct methods of installing the strip lights.

CORRECT BENDING METHODS

Luminous Surface

Bend the strip light into a circle. The diameter must be greater than 160mm (6.5 inches) when the luminous surface is facing the inside or greater than 300mm(12") when the luminous surface is facing the outside.

Luminous Surface

Luminous Surface

Bend the strip light at a right angle. The radius "R" must be greater than 80mm (3.25 inches).

Luminous Surface

Bend the strip light at a right angle. The radius "R" must be greater than 150mm (6 inches).

Luminous Surface

Bend the strip light at an obtuse angle. The radius "R" must be greater than 80mm (3.25 inches) when luminous surface is facing the inside or greater than 150mm(6 inches) when luminous surface is facing the outside.

Luminous Surface

IMPORTANT: PLEASE READ BEFORE INSTALLATION

Do NOT bend the strip lights in any of the following illustrations when installing the strip lights. Otherwise, the strip lights might be damaged and the warranty will be invalid.

INCORRECT BENDING METHODS

Luminous Surface

Luminous Surface

Luminous Surface

The strip light will break if it is bent into a circle, where the diameter is less than 160mm (6.5 inches) when luminous surface is facing the inside or less than 300mm (12 inches) when luminous surface is facing the outside.

The strip light will break if it is bent at an acute angle.

Luminous Surface

Luminous Surface

The strip light will break if it is bent at a right angle, and if the radius "R" is less than 80mm (3.25 inches) when luminous surface is facing the inside or less than 150mm (6 inch) when luminous surface is facing the outside.

The strip light will break if it is bent from the side at any angle.

Luminous Surface

Luminous Surface

The strip light will break if it is bent at an obtuse angle, and if the radius "R" is less than 80mm (3.25 inches) when the luminous surface is facing the outside and less than 150mm (6 inches) when luminous surface is facing the outside.

The strip light will break if it is twisted.

PRODUCT DIMENSIONS

This neon light strip can be cut to desired length. Read the following notes carefully before operations. If you would like to use the entire neon light strip, skip the step 1 - Step 3 and follow the steps to install fixtures.

1. Only cut the neon light strip from the cutting marks. The cutting marks are on the back of the neon light strip.
2. Only start cutting the neon light strip from the end.

1 CUT NEON LIGHT STRIP TO DESIRED LENGTH (IF NECESSARY)

With scissors, cut the rope light to the desired length using the cutting marks on the back. Discard the end section, it's not functional after cutting.

2 FILL SILICONE GLUE IN END CAP

Using Silicone glue, fill in the end cap.

3 INSTALL END CAP

1. Install the end cap onto the end of the neon light strip.
2. Apply Silicone glue along the edge of the end cap.
3. Wait for at least 12 hours to ensure the Silicone glue is solidified.

4 INSTALL STRIP HOLDER

1. Drill 1/4" hole on the desired wall surface.
2. Insert the wall anchor into the drilled hole completely.
3. Attach the strip holder on the wall anchor and secure with screw. Hand tighten until snug.

5 INSTALL NEON LIGHT STRIP TO STRIP HOLDER

Place the rope light onto the strip holders with the back of the light strip against the strip holders. Gently push the light strip until it is embedded in.

6 WIRE CONNECTIONS

Strip both leads from luminaire pigtail. Using two UL listed wire connectors (sold separately), connect the leads from the neon light strip to main supply cable leads.

IR REMOTE

An IR Remote is provided for this fixture. The IR remote requires two AAA batteries.

1 REMOVE THE BATTERY COMPARTMENT COVER

Press the tab and rotate the battery compartment cover to remove it from the IR Remote.

2 INSTALL TWO AAA BATTERIES

Place two AAA batteries into the battery compartment properly.

3 INSTALL THE BATTERY COMPARTMENT COVER

Place the battery compartment cover back onto the IR Remote.

4 IR REMOTE FUNCTIONS

1. On
2. Off
3. Brightness Control
4. 16 color selections

5. Flash

- Jump between seven colors and then repeat. Cycle for 7 seconds duration of the seven colors within this mode.

6. Strobe

- Jump between Red, Green, Blue and then repeat. Cycle for 3 seconds duration of the three colors within this mode.

7. Fade

- Gradient between Red, Green, Blue and then repeat. Cycle for 12 seconds duration of the three colors within this mode.

8. Smooth

- Gradient between seven colors and then repeat. Cycle for 30 seconds duration of the seven colors within this mode.
