1 Optional 1: Install Photocell to Transformer Box

Open the transformer door by releasing the latch on its side. Run the wires from the photocell through the hole on the side of the transformer box. Place the photocell onto the hole on the side of the transformer box and make sure the photocell is in the right direction so that it can be rotated up. Secure it with the lock cap and hand tighten until snug. Connect the plug of the wire into the timer.

Optional 2: Extension Installation of Photocell

2 Remove Lock Ring from the Photocell

Unscrew the lock ring and remove it from the photocell and cord.

3 Install Photocell to Base

Pass the cord through the base and thread the photocell onto the base. Hand tighten until snug.

4 Install Plugs to Transformer Box

Open the transformer door by releasing the latch on its side. Run the wires from the photocell through the hole on the side of the transformer box. Clamp the photocell wires by using both of the plugs. Insert plugs A and B simultaneously into the hole on the side of the transformer box, then secure it with the lock cap and hand tighten until snug. Connect the plug of the wire into the timer.

5 Install Photocell

Place the photocell at your desired location and secure with self-tapping screws. Make sure the photocell is in the right direction so that it can be rotated up.
