

AMP® Low Voltage Landscape Lighting BurrowPro Well Light- AWL-5001-4-B-BZ

Product Description

AMP's BurrowPro well light is great for applications that strive for the utmost quality. This fixture has a thick cast brass grate with thick tempered convex glass sealed under the grate. The brass cap alone weighs more than a standard complete well light fixture that you might find elsewhere. Keep debris, mulch, and leaves out by using this top of the line luminaire. Water drains off its convex glass with ease as well. It comes standard with a complete lens kit with 4 different lenses (diffusion, linear diffusion, frosted and hex louver) so you can tune the lighting effect of your PAR36 lamp to fit your needs. This fixture includes a stainless steel lens clip to hold lenses off of the lamp face. It even has an adjustable stainless steel lamp holder that moves up and down, while also tilting. As with any well light, you should always install these with at least 2" of gravel/ drainage at the bottom of the hole that you've dug to avoid issues.

Product Dimensions

Features & Benefits

- ▶ Solid Brass Grate
- ▶ Pre-aged finish; a natural patina
- ▶ Stainless steel adjustable lamp holder and lens holder
- ▶ Convex Lens (water drains off to prevent puddling)

Specifications
