AMP[®] Low Voltage Landscape Lighting

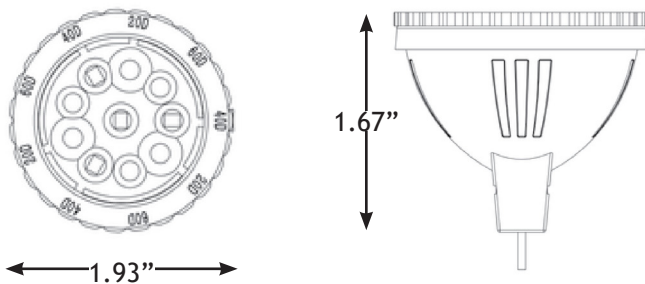

Foliage Enhancing Adjustable Beam Angle LED MR16 Lamp (5W, 4150K)

Product Description

Engineered to withstand the elements, AMP[®] LED lamps are designed specifically for low-voltage outdoor lighting and are backed by a Lifetime Guarantee. With the latest innovation to AMP's line of MR16 LED lamps, the industry recognized adjustable beam spread lamp is now available with foliage color enhancing technology. The 'Cool Green' color temperature produces illumination that vividly enhances the natural colorfulness of plant life - an ideal solution for landscape features that may appear dull with traditional lighting. With the adjustable beam spread feature, professionals can quickly adjust light output in the field to acquire the ideal spread of illumination for any application and adjust as needed overtime. To adjust the lamp, simply turn the lens as needed and align the indication arrow on the lamp with your desired setting. Available beam spreads include: 20°, 40°, 60°. AMP[®] LED MR16 Lamps are a CONFORMING SIZE - the LED lamps will fit any AMP[®] landscape lighting fixtures that require an MR16 lamp.

Product Dimensions

Specifications

- ▶ **Input Voltage, Frequency:** 11-16V
- ▶ **Lumen Output:** 500 lm
- ▶ **Wattage:** 5w (30w Halogen Equivalent)
- ▶ **Correlated Color Temperature (CCT):** 4150K
- ▶ **Color Rendering Index (CRI):** >80
- ▶ **Life:** 40,000 hours (L₇₀)

Features & Benefits

- ▶ Color Temperature optimally designed to bring foliage to life and emphasize nature's beauty.
- ▶ Replacements for:
 - 30W Halogen MR16s
 - Manually Adjustable 20°, 40° & 60° Beam Angles
- ▶ Reduces energy consumption by about 75%
- ▶ Lasts up to 8 times longer than halogen lamps or 40,000 hours
- ▶ No warm-up time, instant-on with full light output and stable lamp to lamp color
- ▶ The various beam angles offered in one bulb allows for flexibility, making one bulb able to be used in various landscape lighting situations.
