

VOLT® Low Voltage Landscape Lighting

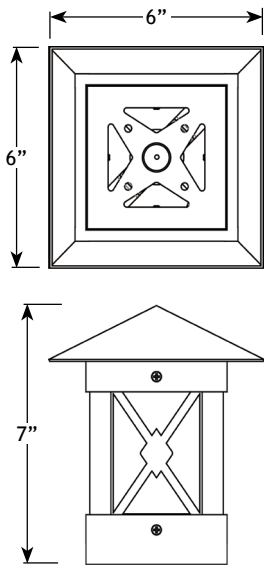

Guardisman Post Top Light- VPL-1011-4-BBZ

Product Description

The VOLT® Guardsman Post Top Light is designed to illuminate heavy traffic areas on decks and patios. These fixtures produce an ambient glow to help you see clearly without being overbearing. The most popular use of this fixture is to mount it on a 4x4 post. Such posts are common on decks, docks and fences. A recessed VOLT® Hardscape Puck Light (mounted under the cap) is the light source. There is no glare because the source is guarded by the fixture's construction. The VOLT® Guardsman Post Top Light comes with a lifetime warranty.
