

VOLT® Low Voltage Landscape Lighting

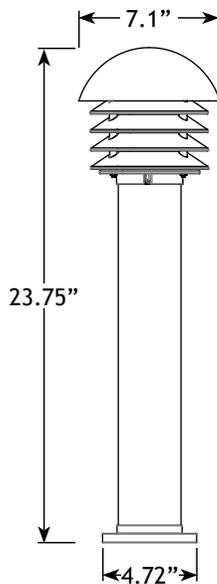

VPL-1041-4-BBZ- 12V Mini Rotunda Bollard

Product Description

The 12V Mini Rotunda Bollard by VOLT® is a solid brass, high quality, low-voltage product made to guide walkways or high traffic areas. Since it is low voltage, it can work in residential or commercial properties. It features a 4 louver construction along with a recessed, adjustable MR16 bulb socket that is designed to completely block from glare; while still producing an incredible spread of light. Includes a built-in surface mount that allows you to mount directly to any flat, hard surface. Also includes a coupler for stake-mounted applications. You can also use concrete anchors for direct concrete pour if necessary.

Product Dimensions

Features & Benefits

- ▶ Four louvers provide maximum glare protection
- ▶ Highly reflective interior coating provides for maximum illumination.
- ▶ Built in mount for easy surface mounting options.
- ▶ Adjustable MR16 socket for a more subtle lighting effect.
- ▶ Includes a coupler for stake mounting.
- ▶ 23.75" tall fixture providing a 10ft diameter beam spread for added safety and security.
