

VOLT® Low Voltage Landscape Lighting

Mushroom Mini Turtle Safe Area Lights - 340 Series

Product Description

The Mushroom Mini Turtle Safe Area Light is a high-quality outdoor light that is great for illuminating smaller areas. Featuring a low height stem and simple; yet attractive hat, this luminaire projects an extra-wide beam of illumination while simultaneously protecting from any direct glare. The wavelength of the required lamps provides adequate lighting for humans, while being virtually invisible to the sea turtles it's designed to protect. This fixture is specifically manufactured to avoid sea turtles being distracted by the light and coming inland where they often perish. Instead; with turtle safe lights, the turtles will safely return to the ocean where they belong.

Product Dimensions

Features & Benefits

- ▶ Solid Brass or Copper Construction.
- ▶ Pre-aged Finish
- ▶ Stem is 1-inch thick and includes extra-long (1-inch) strip resistant threading for greater stability.
- ▶ Beryllium copper socket - more corrosion resistant than copper.
- ▶ Silicone plug at lead wire exit prevents ground moisture and insects from entering luminaire through the stem
