VOLT® Low Voltage Landscape Lighting

VOLT® Nano Clamp Connect- VTR-50-PBK

PRODUCT DESCRIPTION

The VOLT® 50W Nano Clamp-Connect Low Voltage Transformer is the perfect solution for compact settings. Crafted from durable black ABS plastic, this transformer is designed to seamlessly integrate into any outdoor environment. While it's versatile enough for any location, it's especially suited for apartments, condos, and small spaces where easy manual access makes operation a breeze.

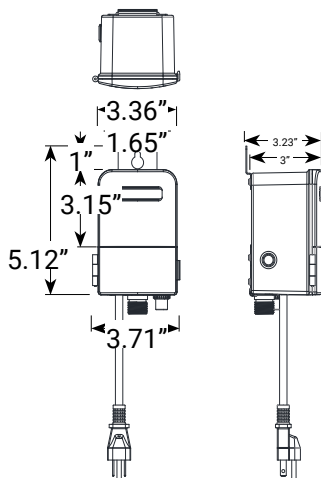

With its two clamp connectors and Wago connectors, this transformer allows for quick and secure connections to your lighting system, and it's compatible with all VOLT® fixtures for added flexibility. Designed for user convenience, it features a removable wire exit for straightforward access to connectors and a reset button conveniently located at the bottom for hassle-free maintenance. The simple on/off button and 120V plug make operation straightforward. For optimal installation, the transformer should be mounted at least one foot above the ground and includes a 5-foot lead wire for flexibility during setup. For added convenience, pair this transformer with the Ring Outdoor Smart Plug (note: Ring Outdoor Smart Plug requires the Ring Smart Lighting Bridge).
