## VOLT® G2 BuddyPro LED Brass Puck Light- VHS-6732

### PRODUCT DESCRIPTION

Introducing the G2 BuddyPro LED brass puck light (2200K), a discreet, versatile lighting solution for effortless outdoor illumination. Now sealed to achieve an IP67 rating, this version of our puck light ensures protection from dust and immersion in water up to 1 meter (3 ft. 3 in.).

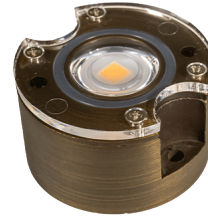

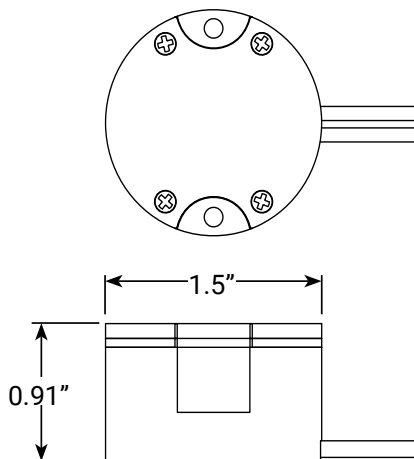

Easily mountable under benches, railings, or overhangs, or seamlessly integrated into decks, steps, or hardscapes, this puck light produces 100 lumens of ample illumination. Customize your experience with three (3) interchangeable lenses (included) – clear, frosted, and diffused or your choice of four (4) different glare guards to direct your lighting and protect from unwanted glare.

#### Applications:

Surface Mounted. Using two small screws, the light can be mounted on any flat surface - under railings, shelves, counters, benches, or any other niche location. It's easy to hide this light to create a compelling lighting effect.

Core Drilled. The perfectly round fixture body and flat top are ideal for installing this light flush with any surface. Using a 1.5" core drill bit, the fixture can be inset into wood, cement, or any other material. The result is a light source that originates from a flat plane - hiding the fixture body for a cleaner non-intrusive installation.

### PRODUCT DIMENSIONS

### SPECIFICATIONS
