# VOLT® Solar Landscape Lighting

## VOLT® Premium Brass Solar Spotlight with Detached Panel- VSAL-9007

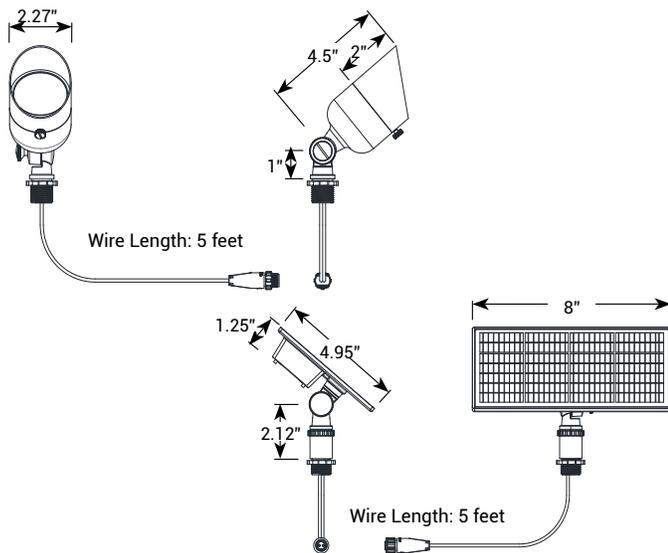

### PRODUCT DESCRIPTION

The VOLT® Premium Solar Spotlight delivers powerful, solar powered illumination with a detachable panel, allowing for optimal sun exposure and flexible installation. Featuring three adjustable brightness levels, this spotlight produces up to 235 lumens of warm 2700K light with a high 90+ CRI, ensuring vibrant and natural illumination for landscapes, gardens, and pathways.

Unlike competitors whose brightness drops within minutes, this spotlight maintains peak brightness for 4+ hours on high mode before dimming, delivering long-lasting, reliable illumination. With a 10ft lead wire, the detached solar panel can be positioned for maximum sunlight absorption, providing efficient charging in just 5.5 hours of full sun. Designed for durability, the IP65-rated fixture withstands outdoor conditions and includes a 9" stake for easy installation.

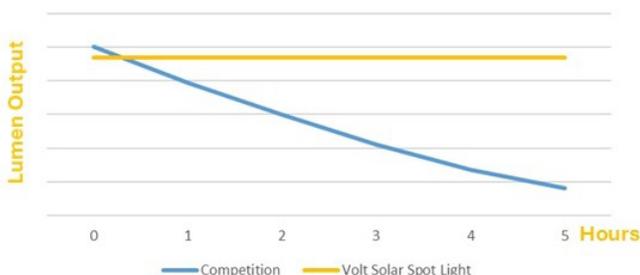

### PRODUCT DIMENSIONS
