VOLT® Low Voltage Landscape Lighting

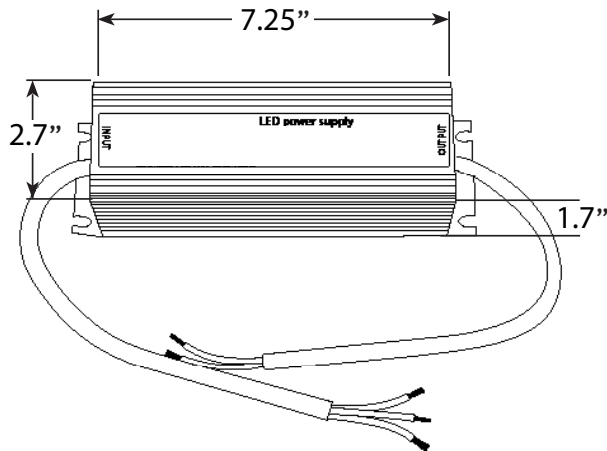

VOLT® 100W Inline Power Converter (120V to 12V) - VTR-100-ARA

PRODUCT DESCRIPTION

The VOLT® Inline Power Converter is designed for creating a low voltage power source option in outdoor areas with existing line voltage power. Designed for input voltage ranges of 100V-277V, this device simply wires into an existing power line and outputs 12V for low voltage applications. The compact size and simple surface mounting make this converter ideal for applications where a low-profile option is preferred compared to a traditional low-voltage transformer (areas such as outdoor kitchens, decks, or docks). A licensed electrician is recommended for safe and proper installation. Safe to use with all VOLT 12V fixtures.

PRODUCT DIMENSIONS

FEATURES & BENEFITS

- UL and cUL Recognized
- Class 2 Power Supply
- Ideal for very remote locations or locations where 120V power lines already exist
- There are bare wires on both ends
- Aluminum Casing that is suitable for wet locations (IP67)
- Compact size is ideal for low profile applications

SPECIFICATIONS

- **Housing:** Aluminum Casing
- **Input Voltage:** 100-277V 50/60Hz 2.5A
- **Output Voltage:** 12V 8.34A
- **Maximum Wattage:** 100W

WARRANTY

5-Year Warranty
